

GP Kids

PRE TEEN: 4TH & 5TH GRADE

We create a Sunday experience specifically designed for 10-12 year olds that meets the unique challenges facing this age group. Our number one priority is for the kids to love God and to want to continue in their journey with God as they enter into middle school.

1 SMALL GROUPS

Every week your child is able to build relationships with other children, have a consistent small group leader, and apply what they are learning to their every day life. We believe that attending the same service time is huge for small groups because consistency is key in building relationships.

2 WORSHIP

We believe that worship is such an important part of what our kids experience on a Sunday. Every Sunday our 4th and 5th graders get an opportunity to join the adult worship set in the auditorium. What a great way for them to experience worship on a more mature level!

3 WE HAVE FUN!

Kids are motivated by having fun, and we want church to be something they look forward to every week! That's why we do our best to create environments where your child can have fun with dedicated times for them to connect with friends and make new ones through pre-service games, activities, and small group discussions. We want to make sure that our 4th and 5th graders make a smooth transition into Student Group once they graduate from GP Kids. That is why we put so much value in building relationships with peers. And what better way to do that than by having fun together?!

4 WELLNESS

We care about the health of your child and the other children too!

If your child has a persistent cough, has had a fever or has vomited within the last 24 hours, please keep your child out of the classrooms for that day.

5 TAKE IT HOME

In GP Kids we provide a great resource center at our "News Stand". That is where you will be able to find all kinds of information to help you continue the conversations at home with your child and to also provide you with some awesome parenting tips. Also, we would love for you to download the ParentCue app on your phone. This is an excellent way to stay informed about what your child is learning and to also have tons of parenting resources at your finger tips.
